Solid Waste Rate Setting

Progress continues on revising the method on how solid waste rates are calculated. A regional approach is moving forward with all the agencies served by Waste Connections working together to form partnership to evaluate rate applications on the same schedule with a unified process of looking at revenues and expenses. More information should be available by July.

FEMA Re-submittal of Public Assistance Applications

It appears that all the information required for the District’s resubmittal of information is complete. Review of the information is underway by FEMA staff so it will now be a matter of time until a decision is made on reimbursement.

American Society of Civil Engineers (ASCE) Award

Staff accepted an award on behalf of the District from the ASCE for Outstanding Emergency Response Project for our efforts at the Cabrillo Basin in 2023. It was recognized that the District staff, consultants and contractor were able to respond to the disaster in an amazingly short period of time which resulted in eliminating additional damage downstream of the basin.
